

BE PART OF THE BITCOIN MADNESS WITHOUT RISKING YOUR MONEY

EASY to understand and EASIER to apply !

Earn \$10 of crypto-currency per day

Congrats, you have made a **really smart choice!**

I will now let you in a little discovery I have made a few days back, but shh! **It's a secret.**

Do not worry, it's **100% legit** and this will allow you to **get some cryptos without having to risk anything** but to waste your time (and trust me you won't).

Why would I reveal my secret? Cause I do not have anything to lose in the process.

I will keep on earning my cryptos whether you join in or not, the rest **is up to you.**

Now let us cut to the chase, you just have to and grab a coffee **read the next few pages.**

It's **EASY to understand** and **EASIER to apply.**

SUMMARY

Chapter 1

The basics you need to grasp about
Cryptocurrency and Bitcoin

Chapter 2

Your first guided steps towards THE
website you need to sign up on

Chapter 3

Step 1: There are some things to
master if you want to success

Chapter 4

Step 2: The best trick I have come up
with to increase my bankroll

Chapter 1

The basics you need to grasp about Cryptocurrency and Bitcoin

You probably have already heard about Bitcoin, Ethereum, Litecoin, Ripple, Doge or others. If all of this is a bit fuzzy for you, **here is the opportunity to learn the basics and take the first step into the exciting world of cryptocurrency.**

WHAT IS CRYPTOCURRENCY?

You could see it as **virtual currency that allows two completely unknown people to securely conduct monetary transactions** without any other external intervention (bank, notary, state, etc.).

Each user validates the transaction with his unique signature. All these transactions are recorded in a large register, viewable by anyone and called the **blockchain**.

Anyone can create a crypto currency based on one of the two principles:

- **PoW : Proof of Work**

To create more coins **mining** is needed. **It is basically having computers compute very complex algorithms.**

- **PoS : Proof of Stake**

To create more coins **staking** is needed.

You can think of **it as a way to put a certain amount of your cryptocurrency in a vault** (as you would do with your money in a bank) in order to validate additional blocks.

What is great about

What is less

Doesn't rely on any bank	Still too few real users
Guaranteed complete anonymity	Huge choice of different tokens
Fast transfer without additional cost or amount limit	Very volatile
No possible counterfeiting	Forbidden in some countries
The quality of transactions is assured	Mining has a strong ecological impact

Now you know about cryptocurrency in general but let's focus on the Super Star of them all and let me introduce you to Bitcoin!

WHAT IS BITCOIN?

You probably came for another planet if you have never heard about it but **Bitcoin is actually the most valuable and most well known crypto-currency in the world.**

i

Bitcoin's abbreviation is **BTC** but you can also hear about **XBT** which is his name on online exchange market

Created in 2008 by Satoshi Natomoko (an alias for an unknown person or group who posted **this paper**), this is a **PoW crypto limited to 21,000,000 units.**

Its official symbol is **₿**

Mining bitcoin becomes harder and harder as time goes by (and less profitable), thanks to what we call **halving**. A period when 210 000 block have been created and the rewards of mining a block decreases.

The BTC value is volatile and evolved from \$0.000764 in its first days to its maximum of \$19,000 in December 16th 2017.

You do not have to own an entire bitcoin as you can buy decimals of it. A **Satoshi** is what is called a fraction of BTC, exactly 0.00000001 BTC.

Today people use bitcoin for 2 principal reasons:

- **Financial use** : Accepted from the dark net to more real shop in the worldwide
- **Speculation or trading** : its volatility make many people interested in its value

WHAT DO YOU NEED TO GET SOME?

Do not worry **no need to go buying an expensive computer** and start mining for hours to be one of the bitcoin's holder. **The easiest way is to « buy » some.**

Chapter 3 and 4 will help you discover the way to do it without risking your own money

You will have to create your own crypto account, kind of a traditional bank account but for crypto that we call a **wallet**.

Do not worry, **no need to spend a dime to have it** and you do not necessarily need to buy and hardware one which can be safer.

After signing up to one of the two website I will introduce you to, you will have access to an exchange, a place to buy and sell a large choice of crypto-currency (like Bitcoin).

Once your account is verified, **you will automatically be the owner of a personnel address** (made of letters and numbers), link to the account automatically made for the crypto-currency you chose.

This is what will allow you to send or received this token of the crypto-currency.

Many websites make it possible to easily open an account and trade cryptos but **you there are two things you need to take into account: the fees those platforms will charge you with and the security they offer.**

This is why I want to advise you to **choose one of these two platforms below.** I am using both of them. They are leaders in the area and are free and safe. They are both based in USA and can be trusted.

#1 COINBASE:

coinbase

The easiest to use, mobile friendly

17 different crypto

Paiement by card or deposit available

Your cryptos are safe and stored offline

Fees on transaction from 1,49% to 3,99%

PERFECT FOR :

Trade beginners or mobile only users

Click on the picture or **HERE** to sign up now and create a verified account to get your first crypto wallet!

#2 **KRAKEN:**

 **kraken**

More than 25 crypto

Lowest fees of the market

Huge trading data and charts

Your cryptos are safe and stored offline

Need API to connect to mobile

PERFECT FOR :

Trained traders or ready to learn

Click on the picture or **HERE** to sign up now and create a verified account to get your first crypto wallet!

READY TO GO TO THE NEXT STEP?

Well done, **you now know the basics about cryptocurrencies and how to get some.** It's quite simple but don't hesitate to **learn more about it.**

You will discover that there are many interesting coins like Ethereum, Ripple, and even some which were just planned to be a joke as Dogecoin was.

The blockchain world is quite fascinating; do not hesitate to use the Internet, Youtube, books and more to keep learning about it.

Never forget that knowledge is power and thanks to the technology we have access to, everything is just a click away.

That is how I started out and how **I discovered THE website which now allows me to really speed up my investment strategy in bitcoin without taking any risks.**

Chapter 2

Your first guided steps towards THE website you need to sign up on

First of all you should always **be on your guards** when exploring the realms of easy money tutorials.

As so, you are probably, as I am myself, scared to stumble upon a scam website or way too good to be true offers. Well thankfully this is not one of those case, trust **me I have spend quite a lot of time searching the Web for feedbacks, ratings, etc.**

In the end, this website turns out to be a **quite simple and unique one.**

I am going to introduce you to it and afterwards, we will talk about the good stuff, **how to make the most of it.**

I am NOT from the company's website.
I'm just a regular user who wants
to share his experience and advice.

SO, WHAT IS IT?

A few years ago, I have discovered what **bitcoin faucet sites** are. It is really easy to understand: they are **sites allowing you to earn a tiny part of bitcoin** (maximum 50 satoshis per hour if you try hard) **by visiting a website and completing simple tasks like captcha.**

Yeah, too good to be true?

Do not worry, the money those websites are making by selling advertising space, clicks, consumer datas, your time, makes up for the tiny bits they are freely giving away

I have spend months trying out a few of them but never found it was worth the time I spent on it.

Until the day I heard about **Cointiply**, thanks to one of my friend who also like cryptos and investment stuffs.

[Click here to create a new account](#)

Cointiply is kind of a **super enhanced faucet website**. Like anywhere else, you can find a faucet to roll. This one runs every hour and make you win between 22 and 280 satoshis (mostly 22) but you also **have a chance to win the jackpot** (between 100,000 and often 500,000 satoshis).

Here **satoshis are not converted in cryptos but in dollars**.

So 1 satoshi = \$0.001, the amount of cryptos depends of the value of it when you withdraw.

You can choose to withdraw in:

- **Bitcoin** (which is probably why you're reading this) : The minimum withdrawal amount is 50,000 satoshis (\$5)
- **Dogecoin**, a too unknown crypto-currency. I advise you to learn about it anyway because as you must know by now, knowledge is ... Power!
The minimum amount is 30,000 satoshis (\$3)

Do not be afraid about the minimum amount I will show you that it is not that difficult to reach and not even important for our system to work (*wait until Chapter 4*).

WHY IS COINTIPLY DIFFERENT?

It is in many ways! First, there is more than the faucet. **You can access a large choice of activities that can make you earn more satoshis:**

INSTALLING APPS

Just download and open it

Cointiply has its own app but only for Android, downloading it will immediately give you 500 satoshis (0,05\$).

You can then download many other apps, available for Android or iOS mobiles.

Average reward for each: 400 satoshis (\$0.04)

PLAYING GAMES

Not the hardest thing to do

Available on Android or iOS mobiles but also on computer.

There are 2 types of games:

- Game apps: mostly full of ads or in-app purchases
- Online games : Puzzle, Casinos, Arcade, etc.

Reward for each: from 30 to 20,000 satoshis (\$2)

COMPLETING TASKS

Answering quizzes, give information, ...

Different quizzes to finish with 100% correct answers, different brand's quizzes to answer to with your personal informations.

Reward for each: from 400 to 1,500 satoshis (\$0.15)

WATCHING VIDEOS

Daily adds and streaming videos

Daily adds available to watch (just a website to visit for a few seconds) or different streaming channel which can give away rewards for the time spent watching them.

Daily reward: around 500 satoshis (\$0.05)

ANSWERING SURVEYS

A part of the system is here

Many choices available on mobile and computer.

Availability depends mostly on your profile. Some of them are really quick to complete (10 minutes tops) and the hardest one can take up to 30 minutes but it's totally worth it.

Reward for each: from 400 to 25,000 satoshis (\$2.5)

PLAYING THE MULTIPLIER

A game of chance ... or probability

Available on computer (*or using your phone's browser*), this game allows you to bet the amount of coins you want (from 10 to 100,000 satoshis) and multiply it.

However, if you choose the wrong spot, you lose your bet.

Reward for each: depends on how lucky you are and on your taste for risk.

AUTOMATIC EARNINGS

Loyalty and interests also pay here

If you **connect daily**, you will receive a bonus for each faucet you roll. As soon as you have 35,000 satoshis you will also earn a **weekly interest** (5% annually) if you keep them on your account.

MAY I REALLY EARN BTC WITH THIS?

Yes, you really can!

Cointiply is **very easy to use** and as you seen, gives you many ways to be reward. If you have the app or follow Cointiply on Twitter you can **use the promo code they often give away** (gives you free satoshis but only to the 1,000 first claimers).

I have already made many withdraws from my Cointiply account to my crypto wallet and always received it.

Here is the last one I have made:

Payment History				
Description	Status	Amount	Coins	Currency
Withdrawal Request View on Blockchain	Payment Sent	0.00227558 BTC	200000 Coins	BTC

Looks great right?

That is not all, I understood a few weeks after starting to earn satoshis that **there is a specific way to be even more efficient.**

Click here to create a new account if you did not yet

Chapter 3

Step 1: There are some things to master if you want to success

You are now **on your way to achieve your goal to earn up to \$10 of cryptos a day**. Even so, you still need some advice to keep you away from the mistakes I have made myself the first days I have spend on Cointiply.

On your first days, your goal is simple:

Increase your bankroll up to at least 20,000 to 100,000 satoshis / coins

The higher the safer will be our system

Here is how to safely reach those levels:

#1 – PLAYING THE MULTIPLIER

This is an easy one: at this point, **NEVER** do it.

I have lost there much more than I wanted to in a matter of minutes.

So please, keep away for now and focus on the other techniques explained after.

#2 – ANSWERING SURVEYS

Understand now that **this will be the easiest way for you too quickly earn huge amounts of satoshis for a small amount of time.**

Unfortunately their availability is mostly based on two criterias:

THE COUNTRY YOU LIVE IN

If you realise surveys are not available in your country (*try at least for a week, that is normal to not finding a lot and be disqualified many times*), do not despair, Cointiply is always evolving and adds some new website for surveys everytime.

It does not mean you cannot follow our system but it could be longer to achieve the same results.

My advice to you is to go straight to the #3 advice.

THE PROFIL YOU HAVE

(Worker, married, childs, etc.)

I do not particularly advise you to lie (*if you change your answers too often about your life, platforms can realize it and ban you from some surveys*). On the other hand you have to know that some of the highest paying surveys are looking for very specific profiles.

Thanks to my experience, I have learned what could help you get the best surveys:

- Working in **IT** (software or hardware)
- Being a **director or in charge of a service**
- Being **in charge of all the house's furnitures**
- Having **kids** (a baby under 1 for baby products and a kid around 12 for video games)
- Having a **functional webcam**

You also need to know a little bit about the most efficient websites there are:

Available on computer & mobile app

Use a system that allows people to participate in a maximum number of surveys a day. **Whether you qualify or not it will often reward you** (not the amount that you would have been eligible to but a small compensation).

Available on computer & mobile app

Gives you **51 coins even if you are not qualified** for a survey you tried to participate in (same as Theorem Reach).

Available on computer & mobile app

Rewards you **6,125 Coins for every survey** you complete.

You can try almost every hours, it's worth it!

If you do not want to be ban, avoid changing your profil's answers too much.

Available on computer (*or using your phone's browser*)

Good variety of surveys but sometimes it can be difficult to qualify for it (high qualification score needed), do not despair if you cannot the first times and keep on trying.

But don't try to lie too much because they can chargeback the coin you earned.

Available on computer & mobile app

Regularly propose you easy surveys rewarding from 1,500 to 3,000 satoshis.

There are more websites available (at least 8 more), sometimes try them because **the more surveys you find the more coins you earn!**

SOME OTHER TIPS ABOUT SURVEYS

TIME:

To reach our goal quickly you will need to **check out the platforms a few times a day** because surveys can appear all day long. That said, some periods of the day are more favorable than others:

In the afternoon on a weekday, UTC time, (based on your location)

Weekends and holidays are usually not the best times, but even then, you might be able to find something.

OSBTINATION

Keep in mind that surveys are looking for specific profiles so **being rejected 10 times before qualifying for a survey is normal**.

CARE

Most of the survey platforms use quality scores and control questions (as « What is the result of $3+2$? »).

They want to check if you are not a bot or that you are not answering randomly, too quickly or change your answer when asking the same questions different times.

Do not fail those checks too much if you want to maximise the number of survey you can qualify to.

GOAL

Set yourself a daily or weekly goal to keep your motivation going. I have started with 10 000 satoshis a day and now that I know how it works, my plan is to reach 30 000 satoshis a day (I often succeed and exceed).

#3 – ROLLING THE FAUCET

It's free and available on computer and mobile every hour (so it can reward you around 300 satoshis a day – \$0.03).

You do not have anything to do except a captcha.

Here is what you can earn:

1	Roll 1 - 69,999	22 Coins (Coins + Cointiplier Bonus)
2	Roll 70,000 to 89,999	36 Coins (Coins + Cointiplier Bonus)
3	Roll 90,000 to 96,999	70 Coins (Coins+ Cointiplier Bonus)
4	Roll 97,000 to 98,999	130 Coins (Coins + Cointiplier Bonus)
5	Roll 99,000 to 99,998	280 Coins (Coins + Cointiplier Bonus)

And if you get the 99,999 number you earn the **BIG** jackpot (at least 100,000 satoshis but often around 400,000)!

#4 – CHATTING IN THE RAIN

No, I do not want you to go out when it's raining don't worry. But you need to know that **you can get free coins just by participating in the chat room.**

Here is how it works:

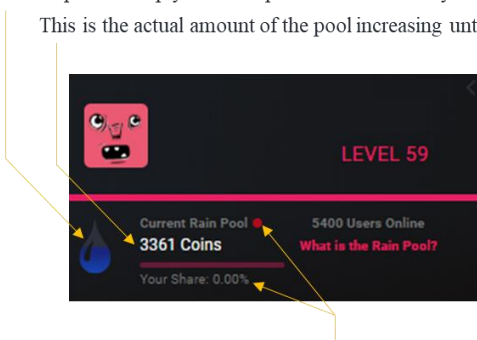

Cointiply Rain Pool

An amount of satoshis based on site activity (and donations of users) is fed to a pool regularly (every 30 minutes or so).

For each round this pool has to increase to a secret and random target and will « rain » when reached. It means that this pool will be shared between all the qualified users of the chat.

This drop starts empty and fill up with the site activity

This is the actual amount of the pool increasing until reach the target

Your dot is red, your share is null, you're not yet qualified

Qualification

When you start to chat, there is a red dot close to the rain pool. It means that you are not qualified yet.

In order to be, **you need to get involved in the chat room** but only with **quality posts** (spam is totally useless).

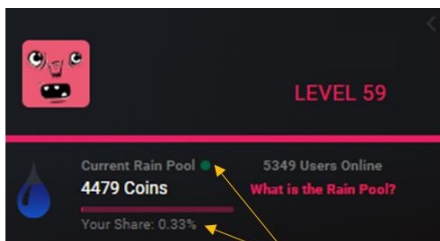

It takes more or less 5 minutes for the site to qualify you; your dot will turn green and show the share of the pool you can claim.

Share

There are many (and some unknown) factors to calculate you share in the pool. One of them is **the amount of coins you have earned during the past hours and the number of level you increased by**.

First, do surveys before going to the chat so you can get a higher share. You will be able to earn almost 400 coins on each round.

Then, think about **posting really usefull messages**: you can help newbies who ask for help, or give good advice like *« hi guys don't forget to take a screenshot after finishing a huge survey in case of issue »*.

You did it ! You'll earn satoshis from this rain pool !

Once the dot is green, not need to keep chatting until the rain falls. **You can leave the chat and do something else.** You will be rewarded (check in you earning history) and just have to come for the next round to start all over again!

#5 – MULTIPLYING ACTIVITES

It really depends now about what you like to do (playing games, download apps, streaming videos, etc.)

I prefer to plan a routine, which could be:

- First watching all the PTC ads (+200 satoshis)
- Then check new apps to download (+500 satoshis)
- Try to answer a quizz (+500 satoshis)
- Answer some surveys (+5,000 satoshis)
- Enjoy the chat's reward many times (+1,000 satoshis)
- And finish playing a mobile game in which I have to reach such level to be rewarded (+10,000 satoshis)

Enjoy the many things to do on Cointiply, and do not forget that each coin you earn is a step towards your goal.

#6 – ENJOYING PROMO CODES

As I have told you, Cointiply also uses many promo codes (2 or 3 weekly) which can give you extra coins.

To find them there are 2 solutions:

- **Follow Cointiply on Twitter** and wait for a new one to be posted
- Download the Cointiply app on your mobile and **wait for the notification** to let you know that a new code is available

Now that you read a huge part of this e-book, **I offer you 3 promo codes** that you can use to get started, so enjoy it!

1

WELCOME

2

INTHELOOP

3

MORECOINS

All those advice are here to help you reach the first step and make you earn a big amount of coins. **Do not withdraw them right now**, as you are now ready to take on the next step. Just one last push!

Chapter 4

Step 2: The best trick I have come up with to increase my bankroll

You now have all the tools to reach a suitable level on Cointiply and be assured to **earn 2 to \$5 each day** (we are talking about \$1,800 a year, not too bad isn't it?).

Now it's time to level up and explore a complementary technique to maximize your earnings!

Do you remember the #1 advice I gave you about Cointiply and its « Multiplier game »?

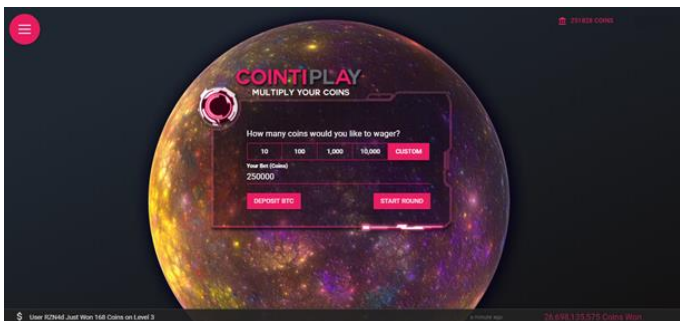

You are now allowed to forget everything I have said about it!

WHAT IS THE MULTIPLIER GAME EXACTLY?

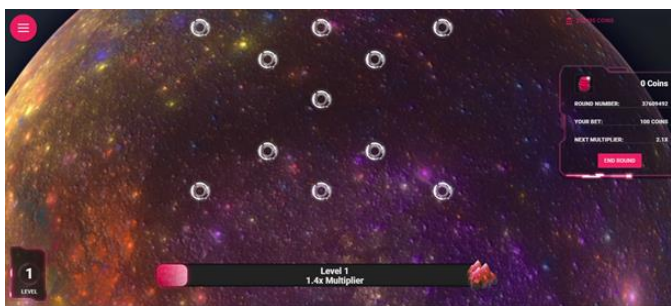

A round of the CointiPlay Multiplier starts like this:

First, you have to **choose the amount of satoshis you want to bet**: if you have a regular account it's between 10 to 100,000

You can switch to a Premium account for 17 000 coins a month or 170 000 a year, this will give you advantages like the possibility to bet until 200 000 coins

Then you will be presented with 11 different targets which look like metallic circles.

Select a target to reveal the gems behind it:

A black gem means that **you lose your stake**

A Red one means that **you win**, your stake increase by the multiplier and **you can then try to increase your winnings with another click or choose to take your winnings home.**

You can progress through the levels by continuing to select targets. **Each level is harder to reach as the probability of losing increases but so are the payouts.**

Here is the sheet with the chances of possible winnings:

Level	Multiplier	Odds	Chance to win
1	1.4x	68,70%	68,70%
2	2.1x	66,00%	45,34%
3	3x	66,00%	29,93%
4	4.4x	66,00%	19,75%
5	6.5x	66,00%	13,04%
6	9.4x	66,00%	8,60%
7	10.38x	66,00%	5,68%
8	20x	66,00%	3,75%
9	29.2x	66,00%	2,47%
10	42.5x	66,00%	1,63%
11	61.3x	66,00%	1,08%

So you have a 1.08 out of a 100 chance to multiply your initial stake by 61.3.

You will need more than luck for that!

I DO NOT EVEN HAVE LUCK, WHAT CAN I DO?

What is interesting here is that **you also have 45.34 out of a 100 chances to multiply you initial stake by 2.1.** Seems quite possible to do it many times isn't it?

This is the goal you have to set to yourself at every round now. **You need to multiply your stake by 2.1 everytime** but if you lose, **double the stake you started to bet with.**

Here is the diagram of it:

If you lose on the second round too, **multiply your current stake by 2 and try again until you win.** When you do win, you **MUST** come back to the initial stake.

HOW TO MINIMIZE THE RISKS I TAKE?

Of course, this trick known as « Martingale » (popular in 18th century) cannot be 100% safe. Mostly because the stake rises exponentially and probabilities are what they are and cannot be defeated.

This is why **you need to keep on doing the other activities** Cointply offers you. In a sense **this is the safest**

way to make coins and the multiplier is the extra (but a risky one).

The most important thing here is your initial stake.

Its amount is totally correlated to your total bankroll (or the part you are willing to lose if things go wrong).

After many tries and a few frights I've calculated that your initial stake should be equal to:

Your bankroll amount x 0.05%

So, if your bankroll is about 20 000 coins, never start the first round with more than 10 coins (20,000 x 0.05%).

Of course it's a small amount but **it can make you earn a lot in a few hours if you stay focus!**

Here is the diagram of what you can expect for each round (if you lose the one before):

Min. bankroll 20 000 coins			
Round	Stake	Possible loss	Possible earnings
1	10	10	11
2	20	30	12
3	40	70	14
4	80	150	18
5	160	310	26
6	320	630	42
7	640	1270	74
8	1280	2550	138
9	2560	5110	266
10	5120	10230	522
11	10240	20470	1034
12	20480	40950	2058
13	40960	81910	4106
14	81920	163830	8202

If your bankroll is close to 20,000 coins, you should lose more than 14 times (do not forget that you have 45% chance to win each time) before losing your entire bankroll (and do not worry I'll not let you do that).

I also made the diagram if you have around 50,000 coins in your bankroll:

Min. bankroll		50 000 coins	
Round	Stake	Possible loss	Possible earnings
1	25	25	27,5
2	50	75	30
3	100	175	35
4	200	375	45
5	400	775	65
6	800	1575	105
7	1600	3175	185
8	3200	6375	345
9	6400	12775	665
10	12800	25575	1305
11	25600	51175	2585
12	51200	102375	5145
13	100000	202375	7625
14	200000	402375	17625

At the 13st round the stake isn't double because the amount maximum for basic user is 100,000 coins.

In grey is the 14st round only if you have made the choice to purchase a premium account and be allowed to bet up to 200,000 coins

I am not a premium myself but it can provide you some other bonus, do not hesitate to learn about it when your bankroll is sufficient

If you want to increase your stake you really must have the bankroll that matches cause if you don't it lead you to bankruptcy.

Here are the diagrams with a 50 and 100 coins stake

Min. bankroll		100 000 coins	
Round	Stake	Possible loss	Possible earnings
1	50	50	55
2	100	150	60
3	200	350	70
4	400	750	90
5	800	1550	130
6	1600	3150	210
7	3200	6350	370
8	6400	12750	690
9	12800	25550	1330
10	25600	51150	2610
11	51200	102350	5170
12	100000	202350	7650
13	200000	402350	17650

Min. bankroll		200 000 coins	
Round	Stake	Possible loss	Possible earnings
1	100	100	110
2	200	300	120
3	400	700	140
4	800	1500	180
5	1600	3100	260
6	3200	6300	420
7	6400	12700	740
8	12800	25500	1380
9	25600	51100	2660
10	51200	102300	5220
11	100000	202300	7700
12	200000	402300	17700

You understand that **the more you stake on the first round the more risk you take**. Because with a 100 coins stake you can loose an entire 200,000 coins bankroll if you do not win until 11 round whereas. With a 50 coins ones you have one round more, and it can make the difference!

The **WORST** mistake you can do is to focus on your possibility of winnings and increase your initial stake. Don't do it.

After few frights I also decided to add a security: **if I don't feel it, I sometimes accept to lose**. I already made some 100,000 coins bet and even if it's only \$10 of free coins it is a lot of time and my heart was pounding like hell.

Thanks to my luck I never lost my entire bankroll but I have decided **to accept to lose for good as soon as the loss are going to be more than what I can earn in a day with survey** and other basic tasks.

This amount really depends of you and your level of involvement in Cointiply.

THAT IS GREAT, HOW MUCH CAN I MAKE?

I actually **stay at the 100 coins stake** level because I think it's too risky to go beyond.

Even so I confess that I sometimes take a little more risk and try to reach the 3x multiplier on the first round (if you try it, **ONLY** do on the first round please). Even if it's less than 1 on 3 chances it can give you a bonus.

During an average day **I can earn (benefits) around 3,500 coins in 10 minutes.**

If you stay focus **it means more than \$2 per hour.**

You deserve it, first because you took time to read all this and then because I am sure you will pay attention and follow my advice.

And of course all this coins count when your share of the pool is calculated!

If **you get rich** thank's to all the BTC you won from this trick, do not forget to come back to my website **HERE** donate a tiny part of them as a reward of my work! 😊

I hope you really enjoyed reading this book!

By doing a good job in **surveys and other tasks** you will be able to earn up to **\$5** in a day. Then, **thanks to our multiplier's system, it's around \$5 more that you can also make** in less than 3 hours.

\$10 a day means **\$3,600 a year** [...]

Most important, none of us knows the real value of the Bitcoin. What is likely to happen is a **democratization of its use and an increase of its value year after year**. Therefore, by using this advice you can also make a **real investment!**

If you success on Cointiply and used my link to sign up I will be able to earn some extra coins.

However, if you have **learned** useful things, managed to **earn bitcoin** or just **want to support me**: do not hesitate to **freely share this e-book, share my website link** and **help me improve the content I offer** by making a **crypto donation** 😊
